

Committee Name: Lakes

Chair: Jane Moore

Date: April 2022

#### COMMITTEE REPORT

Committee Members: Nancy Zolidis, Marilyn Harris

The inner lake auto fill is still not working. Mike Wentworth from Leo Jr has established that the valve and solenoid work properly and therefore the problem is with the float system in the lake. The latter is the purview of John Stack of Architectural Fountains. John was supposed to check out the problem but did not show and is now on vacation for 2 weeks. In the interim I am operating the lake fill manually.

I have called four possible alternative vendors and so far no one else is interested in taking on the project.

Solitude came and set out a tadpole trap this week. The tadpoles are definitely visible but I am told they don't seem to be feeding which is a necessary condition to be trapped. Solitude will withhold the second trap until conditions change. The charge will be \$300 for the one trap rather than the planned \$600 for two.

The lake was treated for algae again this month. The report from Solitude is attached
